

# NALOXONE

Naloxone is a medicine that rapidly reverses an opioid overdose. It is an opioid antagonist. This means that it attaches to opioid receptors and reverses and blocks the effects of other opioids. Naloxone can quickly restore normal breathing to a person if their breathing has slowed or stopped because of an opioid overdose.

## WHY GET NARCAN

Narcan is a nasal spray that contains naloxone. Narcan provides an extra layer of protection for you and if you know someone who is at risk for an overdose. Nebraska had 231 overdose deaths in 2020, Narcan can lower those numbers. Narcan can not harm you if used on someone who is not experiencing an opioid overdose.

Hastings, NE 68901

### SUPER SAVER PHARMACY

710 West State Street  
Grand Island, NE 68801

### U-SAVE PHARMACY

423 W. 4th Street  
Grand Island, NE 68801

## GOOD SAMARITAN LAWS

People may be afraid to call 911 before administering Narcan, in fear of legal repercussions, but no matter what drugs may be present at the scene there is no legal risk when calling for help with a substance overdose. It is very important that a person call 911 first, then administer narcan and wait for help to arrive. Nebraska Good Samaritan Laws want you to not fear helping!
