Executive Summary

The Youth Risk Behavior Survey (YRBS) has been administered to high school students in grades 9-12 in the South Heartland District, Nebraska during the fall semester of 2012, 2014, 2016, and 2018. This project has been primarily funded by the South Heartland District Health Department, while the State of Nebraska pays for administration in any state sampled classrooms. The Bureau of Sociological Research has conducted the 2012, 2014, 2016, and 2018 oversamples.

The 2018 survey was administered to 1,214 students in 9 high schools. Students were selected using random sampling procedures provided by the Centers for Disease Control and Prevention (CDC). These procedures include sampling students by classroom. All students in selected classrooms who were in grades 9-12 were eligible to participate. Please see Appendix B for estimates of sampling error for the 2018 oversample. The 2018 YRBS survey instrument can be found in Appendix A.

Data were collected, entered, and verified for response eligibility. Responses from 44 students were tagged in the dataset as potentially problematic. These students provided five or more out of range answers, repeatedly gave inconsistent responses, drew pictures or patterns on the answer sheet, and/or gave responses on the answer sheet to questions that were not on the questionnaire (e.g. filled out the answer sheet to Q99 when there were only 92 questions). Collected data were not weighted in any way.

Frequency distributions are presented by the seven areas covered in the YRBS following the Executive Summary. The report consists of tables detailing responses for each answer for each question, presented by gender and grade.

Any questions regarding this report or the data collected can be directed to the Bureau of Sociological Research at the University of Nebraska-Lincoln by calling (402) 472-3672, or by sending an e-mail to bosr@unl.edu.

Appendix A: Questionnaire

2018/2019 Nebraska Youth Risk Behavior Survey

This survey is about health behavior. It has been developed so you can tell us what you do that may affect your health. The information you give will be used to improve health education for young people like yourself.

DO NOT write your name on this survey. The answers you give will be kept private. No one will know what you write. Answer the questions based on what you really do.

Completing the survey is voluntary. Whether or not you answer the questions will not affect your grade in this class. If you are not comfortable answering a question, just leave it blank.

The questions that ask about your background will be used only to describe the types of students completing this survey. The information will not be used to find out your name. No names will ever be reported.

Make sure to read every question. Fill in the ovals completely. When you are finished, follow the instructions of the person giving you the survey.

Thank you very much for your help.

4. The exact wording and presentation of questions and response options whose results are reported. This includes preceding interviewer or respondent instructions and any preceding questions that might reasonably be expected to influence responses to the reported results:

Appendix A

5. A definition of the population under study and its geographic location:

Executive Summary

6. Dates of data collection:

The SHDHD YRBS oversample was administered from October 2018 to December 2018.

7. A description of the sampling frame(s) and its coverage of the target population, including mention of any segment of the target population that is not covered by the design. This may include, for example, exclusion of Alaska and Hawaii in U.S. surveys; exclusion of specific provinces or rural areas in international surveys; and exclusion of non-panel members in panel surveys. If possible the estimated size of non-covered segments will be provided. If a size estimate cannot be provided, this will be explained. If no frame or list was utilized, this will be indicated:

The data file used to create the sampling frame is obtained through the Nebraska Department of Education (NDE) website. All school districts have to register with NDE, so the list has complete coverage of school districts in the South Heartland District. The school sample for this YRBS oversample consists of a census of all public high schools in the South Heartland District. Schools are then recruited to participate. Within each of the participating schools, a random sample of classrooms was selected and all students in those classes were targeted for participation. The Centers for Disease Control (CDC) provides BOSR with this random classroom selection procedure. The sampling design follows the probability proportionate to size (PPS) sampling method.

8. The name of the sample supplier, if the sampling frame and/or the sample itself was provided by a third party:

The data file used to create the sampling frame is obtained through the Nebraska Department of Education (NDE) website. All school districts have to register with NDE, so the list has complete coverage of school districts in the South Heartland

District. The school sample for this YRBS oversample consists of a census of all public high schools in the South Heartland District. Schools are then recruited to participate. Within each of the participating schools, a random sample of classrooms was selected and all students in those classes were targeted for participation. 9. The methods used to recruit the panel or participants, if the sample was drawn from a pre-recruited panel or pool of respondents:

Not applicable for this project.

10. A description of the sample design, giving a clear indication of the method by which the respondents were selected, recruited, intercepted or otherwise contacted or encountered, along with any eligibility requirements and/or oversampling. If quotas were used, the variables defining the quotas will be reported. If a within-household selection procedure was used, this will be described. The description of the sampling frame and sample design will include sufficient detail to determine whether the respondents were selected using probability or non-probability methods:

11. Method(s) and mode(s) used to administer the survey (e.g., CATI, CAPI, ACASI, IVR, mail survey, web survey) and the language(s) offered:

The YRBS is a self-administered, paper-pencil survey, and is administered within the classroom. It is administered in English only.

12. Sample sizes (by sampling frame if more than one was used) and a discussion of the precision of the findings. For probability samples, the estimates of sampling error will be reported, and the discussion will state whether or not the reported margins of sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors. Disclosure requirements for non-probability samples are different because the precision of estimates from such samples is a model-based measure (rather than the average deviation from the population value over all possible samples). Reports of non-probability samples will only provide measures of precision if they are accompanied by a detailed description of how the underlying model was specified, its assumptions validated and the measure(s) calculated. To avoid confusion, it is best

to avoid using the term “margin of error” or “margin of sampling error” in conjunction with non-probability samples:

13. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported:

Not applicable for this project.

14. If the results reported are based on multiple samples or multiple modes, the preceding items will be disclosed for each:

Not applicable for this project.
