Executive Summary

The Youth Risk Behavior Survey (YRBS) has been administered to high school students in grades 9-12 in the South Heartland District, Nebraska during the fall semester of 2012, 2014, 2016, 2018, and 2021. This project has been primarily funded by the South Heartland District Health Department, while the State of Nebraska pays for administration in any state sampled classrooms. The Bureau of Sociological Research has conducted the 2012, 2014, 2016, 2018, and 2021 oversamples.

The 2021 survey was administered to 968 students in 8 high schools. Students were selected using random sampling procedures provided by the Centers for Disease Control and Prevention (CDC). These procedures include sampling students by classroom. All students in selected classrooms who were in grades 9-12 were eligible to participate. Please see Appendix B for estimates of sampling error for the 2021 oversample. The 2021 YRBS survey instrument can be found in Appendix A.

Data was collected, entered, and verified for response eligibility. No students' responses were tagged in the dataset as potentially problematic. Potentially dishonest responses are flagged when they repeatedly give inconsistent responses, drew pictures or patterns on the answer sheet, and/or gave responses on the answer sheet to questions that were not on the questionnaire (e.g. filled out the answer sheet to Q99 when there were only 96 questions). Collected data were not weighted in any way.

Frequency distributions are presented by the seven areas covered in the YRBS following the Executive Summary. The report consists of tables detailing responses for each answer for each question, presented by gender and grade.

Any questions regarding this report or the data collected can be directed to the Bureau of Sociological Research at the University of Nebraska-Lincoln by calling (402) 472-3672, or by sending an e-mail to bosr@unl.edu.

Appendix A: Questionnaire

2021 Nebraska Youth Risk Behavior Survey

This survey is about health behavior. It has been developed so you can tell us what you do that may affect your health. The information you give will be used to improve health education for young people like yourself.

DO NOT write your name on this survey. The answers you give will be kept private. No one will know what you write. Answer the questions based on what you really do.

Completing the survey is voluntary. Whether or not you answer the questions will not affect your grade in this class. If you are not comfortable answering a question, just leave it blank.

The questions that ask about your background will be used only to describe the types of students completing this survey. The information will not be used to find out your name. No names will ever be reported.

Make sure to read every question. Fill in the ovals completely. When you are finished, follow the instructions of the person giving you the survey.

Thank you very much for your help.

Appendix C: AAPOR Transparency Initiative Immediate Disclosure Items

1. Describe the data collection strategies employed (e.g. surveys, focus groups, content analyses).

Executive Summary

2. Name the sponsor of the research and the party(ies) who conducted it. If the original source of funding is different than the sponsor, this source will also be disclosed.

Executive Summary

3. The exact wording and presentation of any measurement tool from which results are reported as well as any preceding contextual information that might reasonably be expected to influence responses to the reported results and instructions to respondents or interviewers should be included.

Appendix A

4. A definition of the population under study, including location, age, other social or demographic characteristics (e.g., persons who access the internet), time (e.g., immigrants entering the US between 2015 and 2019).

Executive Summary

5. Dates of data collection.

The SHDHD YRBS oversample was administered during October through December of 2021.

6. Explicitly state whether the sample comes from a frame selected using a probability-based methodology (meaning selecting potential participants with a known non-zero probability from a known frame) or if the sample was selected using non-probability methods (potential participants from opt-in, volunteer, or other sources).

The data file used to create the sampling frame is obtained through the Nebraska Department of Education (NDE) website. All school districts have to register with NDE, so the list has complete coverage of school districts in the Buffalo County area. The school sample for this YRBS oversample consists of a census of all high schools in the Buffalo County area. Schools are then recruited to participate. Within each of the participating schools, a random sample of classrooms was selected and all students in those classes were targeted for participation. The Centers for Disease Control (CDC) provides BOSR with this random classroom selection procedure. The sampling design follows the probability proportionate to size (PPS) sampling method.

7. Probability-based sample specification should include a description of the sampling frame(s), list(s), or method(s). If a frame, list, or panel is used, the description should include the name of the supplier of the sample or list and nature of the list (e.g., registered voters in the state of Texas in 2018, pre-recruited panel or pool). If a frame, list, or panel is used, the description should include the coverage of the population, including describing any segment of the target population that is not covered by the design.

8. Provide a clear indication of the method(s) by which participants were contacted, selected, recruited, intercepted, or otherwise contacted or encountered, along with any eligibility requirements and/or oversampling. Describe any use of quotas.

Not applicable to this project.

9. Provide details of any strategies used to help gain cooperation (e.g., advance contact, letters and scripts, compensation or incentives, refusal conversion contacts) whether for participation in a survey, group, panel, or for participation in a particular research project. Describe any compensation/incentives provided to research subjects and the method of delivery (debit card, gift card, cash).

Participants were provided a letter for their parent/guardian informing them of what surveys they were eligible to participate in. BOSR and BCCP then reached out to eligible schools to participate. Sampled classroom students were then notified that participation was voluntary.

10. A description of all mode(s) used to contact participants or collect data or information (e.g., CATI, CAPI, ACASI, IVR, mail survey, web survey) and the language(s) offered or included.

The YRBS is a self-administered, paper-pencil survey, and is administered within the classroom. It is administered in English only.

11. Sample sizes (by sampling frame if more than one was used) and (if applicable) a discussion of the precision of the results. Provide sample sizes for each mode of data collection (for surveys include sample sizes for each frame, list, or panel used). For probability samples, report estimates of sampling error (often described as “the margin of error”), and discuss whether or not the reported sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors. Reports of non-probability sample surveys will only provide measures of precision if they are defined and accompanied by a detailed description of how the underlying model was specified, its assumptions validated and the measure(s) calculated.

Appendix B

12. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported.

Not applicable to this project.

13. Describe validity checks, where applicable, including but not limited to whether the researcher added attention checks, logic checks, or excluded respondents who straight-lined or completed the survey under a certain time constraint, any screening of content for evidence that it originated from bots or fabricated profiles, re-contacts to confirm that the interview occurred or to verify respondent’s identity or both, and measures to prevent respondents from completing the survey more than once. Any data imputation or other data exclusions or replacement will also be discussed.

Executive Summary

14. Contact for obtaining more information about the study.

Please contact BOSR at 402-472-3672 or bosr.unl.edu with any questions.

15. A general statement acknowledging the limitations of the design and data collection.

Design and data collection were limited due to the fact that the survey is only administered within the classroom, prohibiting students that were not in attendance the day(s) of administration from participating. Students not attending area schools (e.g., homeschooled) were unable to participate in the study.
